## 1. Executive Summary

Quality Control and Monitory Plan (QCMP) is prepared in the scope of the **Development of Regional Joint Master Program in Maritime Environmental Protection and Management – MEP&M** project, and particularly according to what is foreseen in 4.2: *Development and implementation of Internal Quality Control and Monitoring Plan*.

QCMP is an important support to management, planning and implementation of project activities. “Aleksandër Moisiu” University of Durrës is Lead Partner (LP) in QCMP 4.2. *Internal Quality Control and Monitoring Plan* define that encompass guidelines for QA are implemented throughout the project, including development of standardized templates for project deliverables, evaluation forms, internal reporting templates and reporting dynamics, external evaluation schedule and minimum selection criteria for external evaluators, and it take up the results of the strategy implementation evaluation, etc. It ensures that communication and dissemination activities are implemented following high-quality standards, as well as to provide valuable input for project exploitation. QCMP provides quantitative and qualitative input necessary for project implementation, especially possible amendments in implementation that will be required in order to meet project objectives in timely and efficient manner. It serves as basis for preparing plans for continuation of strategic implementation processes initialized during the project lifetime. Plan will be developed and adopted, and implemented throughout project lifetime. Plan will be disseminated and incorporated into the general overview report.

In order to ensure continuous quality control and monitoring of project’s progress, activities and results, internal evaluation as well as external evaluations is planned within the project. Development and implementation of Internal Quality Control and Monitoring Plan is divided in two parts: *event evaluation* and *project evaluation*.

In this report are given the results of the survey of six events, two project reports, handbook, guidelines evaluations and website & social media evaluation that have taken place within this project. The questions in the form were standardized and same for each event, in order to enable comparison across project events. The form was anonymous and it has covered the following sections:

- *Quality of the organization;*
- *Quality of the presentations;*
- *Objectives;*
- *Tasks and activities;*
- *Overall satisfaction*
- *Comments.*

Completing the form took 2 – 3 minutes. Aleksandër Moisiu University of Durrës as Lead Partner (LP) in QCMP 4.2. *Internal Quality Control and Monitoring Plan* has analysed the data and prepare a short brief for all events.

Project quality assurance contains indicators of effectiveness which will be determined in order to guarantee the reaching of the project goals and objectives, each of which is related to a certain standard (requirement or metric), a measure of the success in producing the project results with the desirable level of quality. Indicators are described from a qualitative and quantitative point of view from the perspectives of the overall implementation of the project and particular project objectives.

## 2. Background and Objectives

Being that the objective of the Quality Control and Monitory Plan Manual is to ensure the production of concrete and high-quality results in line with the project plans, questions forms are prepared after each project event and reports.

Objective is to describe the Quality Management procedures that the project team will follow in order to ensure, monitor and control the quality of all processes and deliverables produced during the MEP&M project lifecycle.

The main objectives of the event evaluation for QCMP are to:

- Monitor the project progress;
- Ensure the quality comprehensiveness of each activity and output separately and of the whole project;
- Ensure the quality of the key processes and the key results of the project.
